

Zeyar Win Thu

Tokyo, Japan | 070-9310-1776 | official.zeyarwinthu@gmail.com | GitHub: <https://github.com/zeyarwinthu>

Professional Summary

Full-stack developer with 6+ years of experience building backend systems, web applications, and mobile solutions using C# and .NET technologies.

Specialized in ASP.NET Core, Entity Framework, LINQ, REST APIs, and cloud platforms including Azure and AWS.

Hands-on experience improving system reliability with background processing, distributed locking, and cloud monitoring tools.

Led teams of up to 5 members and contributed across the full software development lifecycle.

Skills

Backend Development: C#, ASP.NET Core, .NET Framework, .NET 6, .NET Core, ASP.NET MVC5, Entity Framework, Entity Framework Core, LINQ

Frontend Development: HTML5, CSS3, JavaScript, jQuery, Vue.js, Angular

Mobile Development: Xamarin

Databases: MySQL, SQL Server

Cloud & DevOps: Microsoft Azure, AWS, AWS CloudWatch, Windows Server 2019, Git

APIs & Architecture: RESTful APIs, Repository Pattern, Google APIs, Firebase, OneSignal, Agile

Libraries & Tools: Hangfire, Log4Net, Redlock, AutoMapper

Work Experience

Senior Backend Developer

REZERV Co., Ltd | Singapore (Remote)

Oct 2022 – Present

- Developed and maintained backend services for rezerv.co using .NET 6.
- Implemented Hangfire to support background job processing.
- Strengthened data consistency by using Redlock for distributed locking.
- Streamlined object transformation by applying AutoMapper across backend workflows.
- Monitored application performance and logs through AWS CloudWatch.

Senior .NET Developer

UNIFINE Co., Ltd | Myanmar

Apr 2022 – Sept 2022

- Managed web projects using Angular.
- Developed APIs using .NET Core.
- Maintained Windows Server 2019 infrastructure.

- Integrated OneSignal into application workflows.
- Connected Google services through third-party API integrations.

Assistant Lead

THETYS Co., Ltd | Myanmar (Thailand base)

Mar 2020 – Apr 2022

- Led a team of up to 5 members across the full software development lifecycle.
- Analyzed requirements and assigned tasks to team members.
- Designed and implemented database architecture.
- Developed mobile applications using Xamarin.
- Built REST APIs using the Repository Pattern.
- Managed App Services and databases through Microsoft Azure Portal.

Web Developer

THETYS Co., Ltd | Myanmar (Thailand base)

Feb 2019 – Feb 2020

- Developed frontend websites using HTML5, CSS3, JavaScript, and Vue.js.
- Built server-side web applications with ASP.NET and .NET MVC5.
- Created Web APIs using .NET Core.
- Used Entity Framework Core and LINQ for data access.
- Contributed to 5 software development projects.

Projects

rezerv.co Backend Services

Technologies: .NET 6, Hangfire, Log4Net, Redlock, AutoMapper, AWS CloudWatch

- Built and maintained backend services for rezerv.co.
- Implemented background job processing and logging for operational support.
- Improved reliability through distributed locking and cloud-based monitoring.

Education

Bachelor of Computer Science (B.C.Sc)

University of Computer Studies - Monywa

Graduated: February 2019

Certifications

- Japanese-Language Proficiency Test (JLPT) N4

Languages

- Japanese (JLPT N4)

Tools & Technologies

C#, ASP.NET Core, .NET 6, .NET Core, ASP.NET MVC5, Entity Framework, Entity Framework Core, LINQ, Xamarin, Angular, Vue.js, HTML5, CSS3, JavaScript, jQuery, Microsoft Azure, AWS CloudWatch, Windows Server 2019, Hangfire, Log4Net, Redlock, AutoMapper, Git, MySQL, SQL Server, OneSignal, Google APIs, Firebase.
